

Nguyễn Văn Đạt - 1352080060

đây là interface Mail chứa các method sendMail, log()
class MailImpl sẽ implements Mail và triển khai các method
của Mail như sau

```
interface Mail {
```

```
    public void sendMail();
```

```
    public void log();
```

```
}
```

```
class MailImpl implements Mail {
```

```
    @Override
```

```
    public void sendMail() {
```

```
        System.out.println("gửi mail");
```

```
    }
```

```
    @Override
```

```
    public void log() {
```

```
        System.out.println("đang ghi log");
```

```
    }
```

```
}
```

```
class Main {
```

```
    public static void main (String[] args) {
```

```
        MailImpl m1 = new MailImpl();
```

```
        m1.sendMail();
```

Một trang vở một tương lai

Ques 2

```
abstract class Shape {  
    public String  
    interface Shape {  
        public String getArea();  
        public void getPerimeter();  
        public void draw();  
    }
```

```
class Rectangle implements Shape {
```

~~@Override~~

public int width

public int height

@Override

```
String getArea (width, height) {
```

```
    System.out.println ("Hinh Rectangle");  
}
```

```
class Circle Rectangle implements Shape {
```

```
public int sides;  
public per double perimeter;  
@ override  
public void getPerimeter() {  
    System.out.println("perimeter" + perimeter);  
}
```

```
class Main {
```

```
    public static void main (String[] args) {  
        Rectangle r1 = new Rectangle();  
        Circle c1 = new Circle();  
        r1.getArea();  
        c1.getPerimeter();  
    }
```

```
}
```
